

KEYSTONE
EXPERTS + ENGINEERS

Expert Forensic Consultants

Keystone Experts & Engineers uses technology based solutions to provide forensic expert consulting, challenging industry norms to set a new standard.

Who We Are

Headquartered in Colorado with a nationwide reach, Keystone Experts & Engineers specializes in forensic engineering, fire investigations, and building consultant services for residential, commercial and industrial structures. Our company has developed a strategic and skilled national base of multi-disciplined engineers, investigators, contractors, and consultants. These teams provide us the ability to handle day-to-day volume, as well as the capacity to scale up to meet the needs of our clients when large weather events occur.

Even when demand increases, our turnaround times remain at the top of the industry.

Our Philosophy

While our business may be complicated, our philosophy is true north. We proactively leverage the latest technology to allow our experts to efficiently capture crucial information to provide accurate, fact-based reports when you need them. To that end, Keystone is committed to growing beyond solely providing expertise in the industry. We strive to become your solutions provider and most importantly, trusted partner.

The Keystone Solution

Keystone Experts & Engineers understands your needs. We deliver a streamlined solution that leverages technology to provide **clear** and definitive conclusions with reliable, **industry-leading turnaround time**, with open customer **communication** at an affordable **cost**.
